Women is an essential part of key economic activities and for nation development. Women entrepreneurs can originate new jobs for themselves and others. Women entrepreneurship has been recognized as an important factor of economic development Women’s entrepreneurship can make a particularly strong contribution to the economic well-being of the family and communities, poverty reduction and women’s empowerment, thus contributing to the Millennium Development Goals (MDGs). However, they still represent a minority of all entrepreneurs. Women entrepreneurs often face gender-based barriers to starting and growing their businesses, like discriminatory property, matrimonial and inheritance laws and or cultural practices, lack of access to formal finance mechanisms, limited mobility and access to information and networks, etc. Thus, governments across the world as well as various developmental organizations are actively undertaking promotion of women entrepreneurs through various schemes, incentives and promotional measures.

**Keywords:** dynamics, skill development, policy initiatives.

The term “Women Entrepreneurship”, is an act of business ownership and business creation that empowers women economically, increases their economic strength as well as position in society. Women entrepreneurs create new jobs for themselves and others and can provide society with different perspectives and approaches to management, organisation and business issues” (OECD, 2004). Women entrepreneurs may be defined as a women or group of women who initiate, organise and run a business enterprise. The Government of India has defined Women Entrepreneurs based on women participation in equity and employment of a business enterprise. Accordingly women entrepreneur is defined as an enterprise owned and controlled by a women having a minimum financial interest of 51 per cent of the capital and
giving at least 51 per cent of the employment generated in the enterprise to women. The role of Women Entrepreneurship in the emergence of entrepreneurs in a society depends to a great extent on economic, social, religious, cultural and psychological factors prevailing in the society. There is a crucial need to recognize the talent of women and give them a requisite platform to start their business in order to show their visibility in the economy. The objective of this study is to find out the factors that impact upon the women entrepreneurs in their social and economic development.

Objectives of the Study

- To study the dynamics of women entrepreneurship in India.
- To study the impact of ICT on women entrepreneurship and highlight the ICT Initiatives for prospective women entrepreneurs.

Determinants of Women Entrepreneurship

Entrepreneurship in developing countries has been subject to numerous studies (van der Sluis et al. 2005; Ardagna and Lusardi, 2008; Schoar 2009). Many barriers to entrepreneurship, such as the business environment, affect both genders. There is also a growing literature on woman entrepreneurship (Minniti 2010; Kobeissi 2010) and especially on India (Ghani et al. 2012, 2013, 2014) attempting to identify factors more definite to woman entrepreneurship. These studies have identified education, income per capita, infrastructure, family situation, self-perceptions, or political representation as decisive to woman entrepreneurship. Agglomeration and network benefits have also been deemed important (Ghani et al. 2012).

Types of Women Entrepreneurs

Entrepreneurship Development Institute of India, Ahmedabad defines that a major stratification of women entrepreneurs can be made as follows:

- **Chance Entrepreneurs:** These entrepreneurs start business without any preparation, clear goals or plans. They happen to grab the opportunities which they come-across.

- **Forces Entrepreneurs:** These entrepreneurs start business due to some mishaps in their families like death of father or husband, divorce etc.

- **Created Entrepreneurs:** These entrepreneurs are properly identified, motivated, encouraged and developed through EDPs as a part of a strategy to develop women as competent entrepreneur.
Traditional Characteristics of Microfinance

- Small scale
- Loans for microenterprise productivity
- Loans without collateral
- Group lending
- Target poor female clients
- Simple application processes
- High interest rates

Women Entrepreneurship Policies in India

The Ministry of Women and Child Development has several ambitious programs for female self-employment: Support to Training & Employment Programme for Women (STEP) was launched in 1986 to help groups of vulnerable women to set up their own business to get out of poverty and improve their social status. The first stage of the process is the creation of a Self Help Group (SHG) that will help women to build self-confidence and give them a first experience of money management by collecting savings and lending to individual members. A business plan is then prepared by a non-government organization (NGO) with a focus on traditional sectors of employment relevant to the specific area. Members of the SHG then receive suitable vocational training, and fixed assets as well as working capital requirements are financed jointly through a government grant and the NGO grant/loan or a bank loan.

Government subsidies are then phased out over a period of 5 years with the ultimate goal of self-sufficiency. STEP also provides support services such as health check-ups and child care for the duration of the project, and organizes general awareness programs about nutrition and gender issues. The National Credit Fund for Women, also known as Rashtriya Mahila Kosh (RMK) was set up in 1993 provides access to micro-credit to poor Indian women, by making loans to microfinance institutions (MFI) involved in women empowerment. Nonprofit organizations can apply for a loan from RMK, including NGOs, Cooperative societies, Government organizations, or State Women Development Corporations (state-level equivalents of the Ministry of Women & Child Development), provided the organization has sufficient experience in credit management. RMK also finances agricultural vocational trainings through a dozen partner institutions across India. The Swayam Sidha Scheme, also known as Integrated Women Empowerment Programme was launched in 2001 and ended in 2008, its objectives are similar to STEP, except that it put more emphasis on the first stage of STEP. After the creation of the initial Self- Help Groups, the Swayam Sidha Scheme requires the SHGs to federate into Village Societies, including representatives of each SHG and local functionaries. The Village Societies will then federate into Block Societies, (the block being the administrative unit directly under the district) that can ask for registration as non-profit society. The aim is to strengthen the links between women SHGs to make them more powerful. This hierarchical structure is also meant to provide a single channel for the delivery of the various schemes of the Ministry of Women and Child Development.
Besides actions of the Ministry of Women and Child Development, certain schemes of the Ministry of Micro, Small and Medium Enterprises (Ministry of MSME) and its Development Commissioner, give preferential treatment to women. This preferential treatment is usually shared with SC/ST categories, North-Eastern states, and sometimes with micro-enterprises (defined in terms of the size of fixed assets). Under the Prime Minister’s Employment Generation Programme (PMEGP) discussed in Box 2 the share of the government grant in setting up a micro-enterprise rise from 15% to 25% in urban areas and from 25% to 35% in rural areas when the beneficiary is a woman. Additionally, the share of the project cost to be supported by the beneficiary drops from 10% to 5%, the remaining 70% to 60% being covered by a bank loan.

Under the Micro and Small Enterprises - Cluster Development Programme (MSE – CDP) created in 2007, clusters with more than 50% of female-owned enterprises benefit from a government grant of 90% for “Soft Interventions” (organization of training sessions and seminars, hiring of business consultants etc.) and for “Hard Interventions” (creation of common facility centres, such as testing centres, warehouses, effluent treatment plant etc.) instead of a government grant of respectively 75% and 70% for low-priority clusters. The government grant is also raised to 80% (instead of 60%) for “Infrastructure Development” (construction of roads, power or water distribution networks etc.) and the minimum threshold to benefit from soft interventions is lowered from 25 to 20 cluster units. Under the Credit Guarantee Fund Scheme for Micro and Small Enterprises, launched in 2000, the guarantee cover for women-owned businesses in case of default is extended to 80% of the bank loan instead of 75%.

The Trade Related Entrepreneurship Assistance and Development (TREAD) for Women aims at improving access to credit for female entrepreneurs in non-agricultural activities. The objective is to mobilize the help of local NGOs to formulate business plans and obtain bank loans for one or several female entrepreneurs, and provide technical training and business advice. The government grant amounts to 30% of the total project cost, which in the guidelines of TREAD includes not only fixed assets and working capital but also training and consultancy fees and participation in product exhibitions.

The Mahila Coir Yojana, managed by the Coir Board under the Ministry of MSME: was launched in 1994 to modernize the traditional industry of the coir fibre by providing technical training and subsidies for the use of motorized spinning machines. Only women are eligible for assistance. They first receive a two-months training on the new equipment assorted with a
training stipend, and the spinning machine is then purchased using a 75% government subsidy.

SIDBI has also its own scheme for women entrepreneurs, namely the Mahila Udyam Nidhi Scheme to make subsidized loans to female entrepreneurs in small-scale businesses. New businesses as well as existing businesses can apply for assistance to upgrade technology, increase of production capacity or financial bailout. The soft loan (subsidized loan) is not to exceed 25% of the project cost, while the remaining 65% (taking into account the beneficiary’s own contribution of 10%) can be financed under the usual SIDBI loan policy.

Finally, the Ministry of Rural Development and the Ministry of Housing and Urban Poverty Alleviation have designed a preferential treatment for women through their own self-employment schemes (respectively the Swarna Jayanti Gram Swarojgar Yojana and the Swarna Jayanti Shahari Rozgar Yojana). These schemes are analogous to PMEGP but they each apply to rural or urban areas only. The Ministry of Rural Development has issued guidelines stating that women should constitute no less than 40% of the beneficiaries, and the Ministry of Housing and Urban Poverty Alleviation has provided for a women-specific component of its own scheme similar to STEP.

**Impact of ICT on Women Entrepreneurship**

ICT emerging as an increasingly valuable business tools for women entrepreneurs. It is essential that women entrepreneurs must equipped themselves with these set of techniques for effective use of such technology for the achievement of business goals that leads to the achievement of ultimate aim of MDGs.

Dynamic changes in ICT landscape, in terms of infrastructure, new innovations, and institutional norms impended challenges upon women entrepreneurs potential to start, and grow business in this era of globalization. In India, over 110 million women are active users of internet and growing at a rate of 46% for females, according to a report by Internet and Mobile Association of India and IMRB International. Urban India isn’t just witnessing women’s contribution to social change, health care and education. There are a considerable number of initiatives undertaken by rural women at the grass root level too in spreading awareness for gender equality Women village-level entrepreneurs run a range of Common Service Centres in India such centres offers online banking services and enrolls villagers for the Aadhar programme.
1. It empowers women entrepreneurs through application of information and communications technologies.

2. ICT enables access to markets, ownership and technology by allowing women entrepreneurs to seize new market opportunities to create jobs and be competitive and sustainable.

3. E-commerce which involves the buying and selling of goods and services on the internet or other electronic platforms is making it possible for micro-entrepreneurs to engage in trade by creating virtual store on websites for the global market.

4. Women entrepreneurs are now using mobile phones, SMS, email and internet based telephony such as skype to connect with customers, business associates and partners.

**ICT Initiatives for Women Entrepreneurs**

**ICT Initiative “SAKSHAM — Power of SHE”**

To support and encourage entrepreneurship among women, National Institute of Electronics and Information Technology (NIELIT), a body with the Ministry of Electronics and Information Technology, has launched an initiative ‘Saksham—Power of She,’ aimed at encouraging entrepreneurship among women under ‘Digital India’. Over 200 female students from NIELIT Centres across different geographical locations participated through smart virtual classrooms that facilitate live interactive session through video conference. The students who are in the process of acquiring industry relevant skill sets in IT and electronics, were sensitised about entrepreneurship.

**IT for Masses scheme for Women**

NIELIT Delhi Centre is providing free training to women candidates under a Diet Y (Department of Electronics and Information Technology) sponsored project titled “IT for masses for Women”. Under this scheme free training is being provided to women with low income group (Annual income upto 5 lacs). Women candidates with minimum 8\(^{th}\) qualification are being trained in basic e-literacy programme (BCC), Undergraduate women are being trained as Data Entry operators (CCC and Typing with introduction to Tally) “Training of Women in Delhi for creating women Entrepreneurs/ Data Entry operators with an exposure to Tally, to promote awareness and to enhance vocational skills of women”.

Skill Development Initiative

Skill Development Initiative by Department of Industrial Policy and Promotion, Ministry of Skill Development and Entrepreneurship, Government of India, in an endeavor to create a conducive social-cultural and economic environment for women. The special focus of this initiative is to skilling and empowering women. For this, several initiatives have been taken to further strengthen the eco-system.

1. 30% of all the seats are reserved in all Govt. and Private ITIs for courses for women candidates which includes girls as well.

2. 5 new RVTIs (Regional Vocational Training Institute) for women in Skill Development have been established during FY 2015-16 and 3 are to be opened in 2016-17. 2 RVTIs are being established in Himachal Pradesh (Jhundla, Shimla) and Tripura (Anandanagar, Agartala) to facilitate the requirements in the hilly terrain since August 2015.

3. NSDC (National Skill Development Corporation) training partners have trained a total of 155,236 Women Candidates across India of which 54,456 have been placed as on October 31, 2016.

Recommendations

- First and foremost, education is of prime importance for women’s in order to accelerate their talent. Incite among young women’s to pursue higher education.

- Training and Development programs for prospective women entrepreneurs should be organized at regular intervals highlighting the new policies introduces by MSME’S and there must be proper monitoring of that also to ensure their participation.

- The benefits of various government schemes and programs must reach to the women entrepreneurs through or by awareness camps at remote villages of India so that they can avail the advantage of it

- Provide a conducive external environment for women entrepreneurs to enable them to achieve effective utilization of available resources.

CONCLUDING REMARKS

Women in India deals with so many challenges on the part of societal mind setups and thoughts. A lack of adequate knowledge and skills required for entrepreneurship is often considered to be one of the most significant barriers to the formation of business enterprise.
Entrepreneurship skills are an accumulation of skills that includes planning, organizing, financial management, and personal traits like self-initiative and the ability to deal risks and uncertainty. Although entrepreneurship skills are not always necessary to operate a successful business entity it generally enhance the possibility of survival and growth of business. In the case of women entrepreneurs, pre-marital involvement to entrepreneurial activities within the family and support from the spouse as well as relatives and friends plays a positive role. Women entrepreneurship represents a status of women in India in terms of their contribution to various sectors of an economy and thus leads towards gross domestic product. They play a very significant role in nation development. There is a need to be responsible about women development by the family, society, government and public at large then only women entrepreneurship developments is attainable.
